

Welcome

B. V. S. SIVA PRASAD
Assistant Director
AP Forensic Science Laboratory

Forensic Physics

- Counterfeit currency notes and fake security documents
- Glass
- Paint
- Soil
- Spurious Articles (Automobile spares, engine oil bottles, printer cartridges, watches, branded apparel etc.)
- Tool marks
- Track marks – Footprints/footwear prints & tyre marks
- Restoration of erased numbers on Vehicles and fire arms
- Spurious metals (Gold, Platinum)
- Precious stones (Diamonds etc.,)
- Electrical wires/Fuses (short circuit cases)

Water Mark

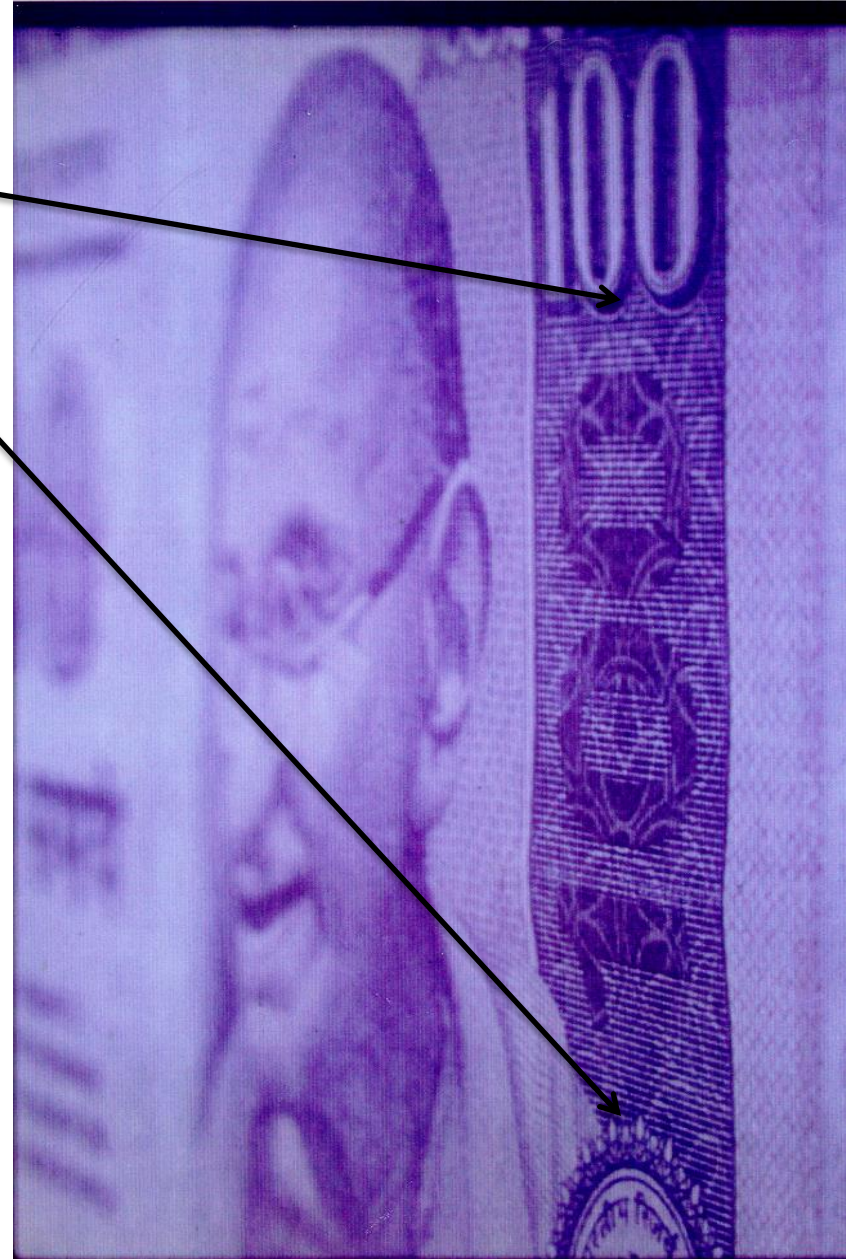

Genuine

Fake

LATENT IMAGE

- Denomination “100” which is hidden in the vertical band is the **latent image** .
- The **latent image** “100” cannot be replicated by photocopiers .

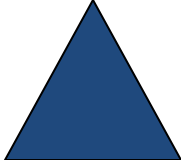

Identification Mark

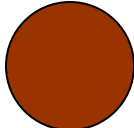

- Rs.20 and above
- Introduced in the note to help the visually impaired to identify the denomination
- Appears on the left of the watermark window
- This mark is in intaglio printing and it is in different geometrical shapes for various denomination
- To make the intaglio effect more prominent, the **engraving depth has been increased from 83 microns to 160 microns.**

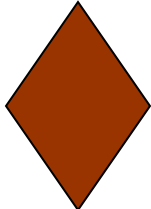

Identification mark

Rs.20 →  RECTANGLE

Rs.50 →  SQUARE

Rs.100 →  TRIANGLE

Rs.500 →  CIRCLE

Rs.1000 →  DIAMOND

Counterfeiting

- A person is said to ‘counterfeit’ who causes one thing to resemble another thing, intending by means of the resemblance to practice deception or knowing it to be likely that deception thereby will be practiced”
- Counterfeiting offence under Sec.489A to 489E of IPC
- any forensic laboratory, Bank note press, any security printing press (Devas/ Nasik) are authorized to examine the counterfeit currency notes.

EXAMINATION OF GLASS

- Broken glass pieces / particles / fragments is a source of evidence in cases like burglary, vehicle theft, hit & run cases, automobile accidents
- When a window pane was broken by a projectile most of the fragments fly in the direction of blow but some tiny particles fly backwards and may be embedded in clothes of accused

EXAMINATION OF GLASS

Available forms:

- Glass pieces, fragments, sheets of glass containing broken pattern etc.,
- Glass fractures
 - Radial fractures
 - Concentric fractures
 - Rib marks
 - Cone fracture
 - Sequence of bullets
 - Backward fragmentation

GLASS FRACTURES

PHYSICAL MATCHING

Broken indicator dome pieces

EXAMINATION OF GLASS

■ METHODS OF EXAMINATION:

- Physical matching
- Microscopic examination
- Colour
- Ultra violet fluorescence
- Density
- Refractive Index
- Elemental composition (By instrumental methods)

EXAMINATION OF GLASS

- Certain metal oxides are used for specific characteristics of glass
Borex & aluminium oxide --- Heat resistant glass
Lead oxide ----- For absorption of radiation
- Impurities in raw materials act as trace elements and provide specific identifiable characteristics in glass.

EXAMINATION OF PAINT

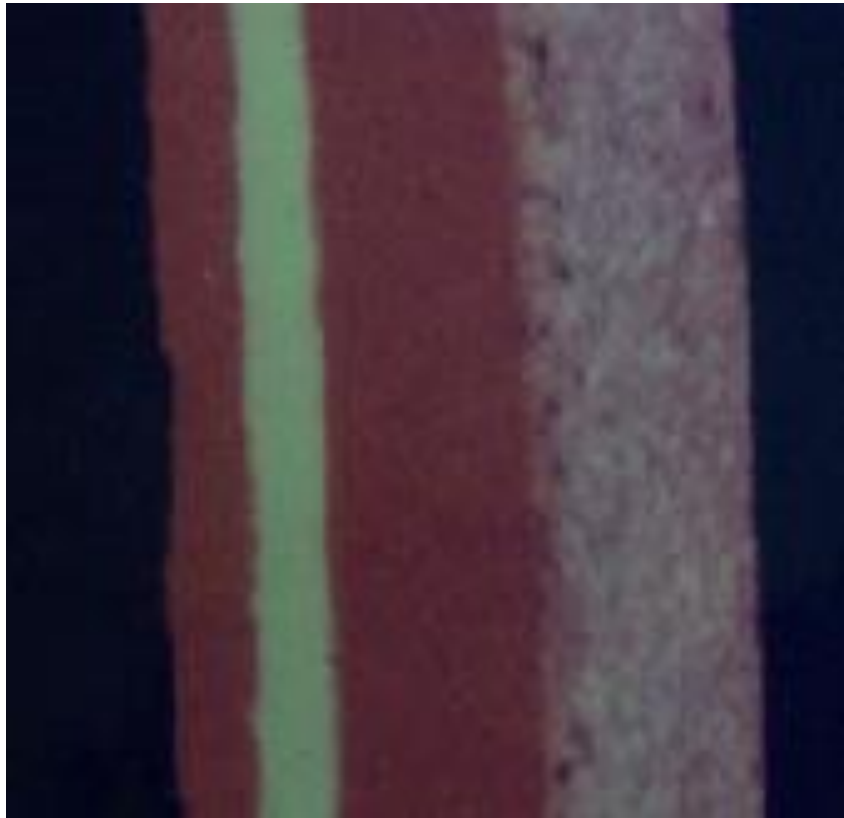

■ Available forms:

Chips, flakes, smears etc.,

■ METHODS OF EXAMINATION:

- Macroscopic examination
- Microscopic examination
- Ultra violet fluorescence
- Density Gradient analysis
- Instrumental analysis

CROSS SECTION OF A PAINT CHIP

EXAMINATION OF SOIL

■ Definition

Soil is a complex mixture. It contains mineral particles, plant materials, living organisms, decayed and other organic matter (humus), man-made particles etc.,

- Available forms:

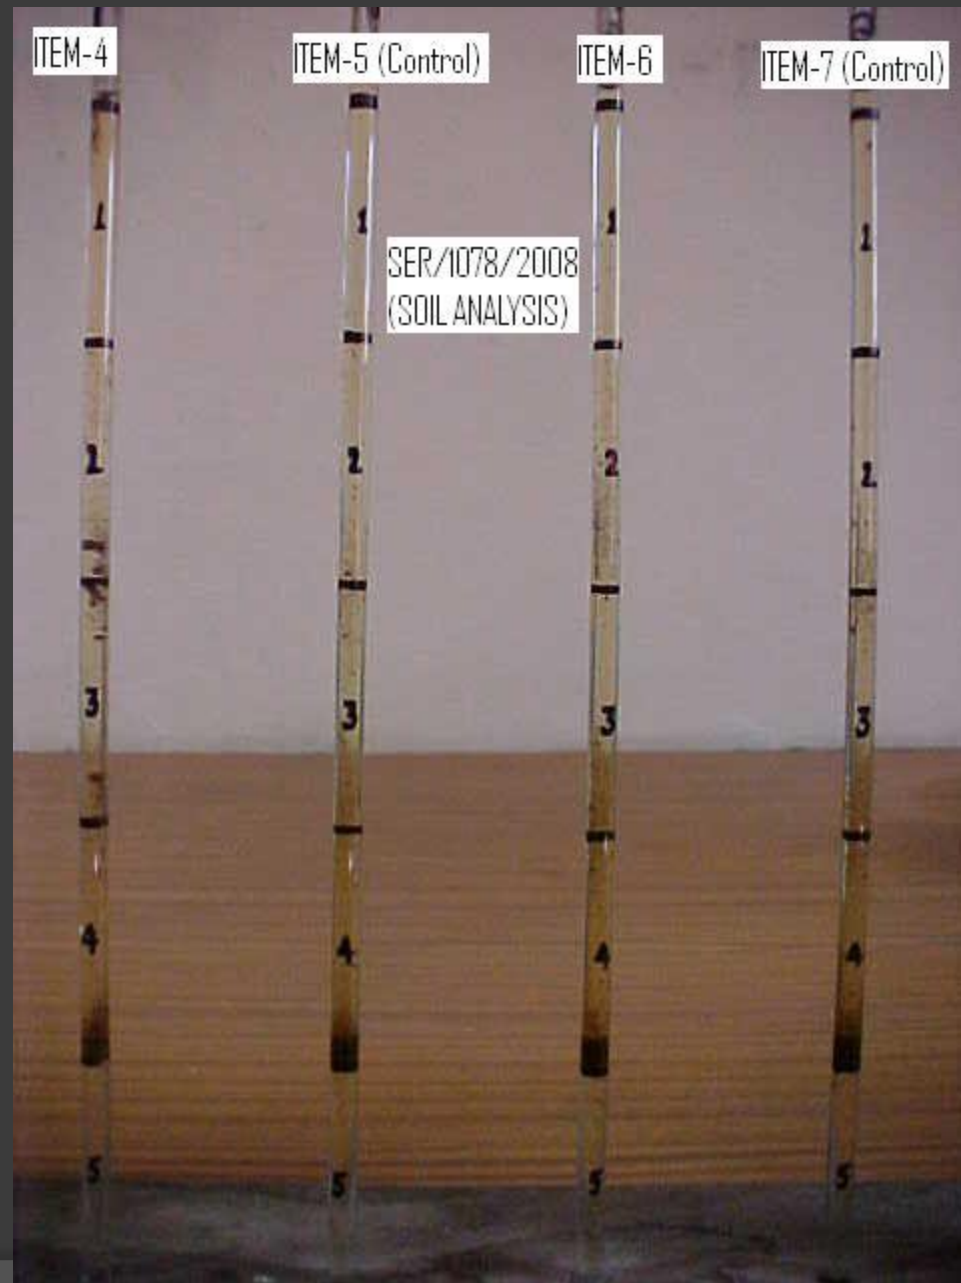

Soil, mud, dust and debris

EXAMINATION OF SOIL

■ METHODS OF EXAMINATION:

- Macroscopic examination
- Microscopic examination
- Ultra violet fluorescence
- Particle size distribution
- Dry colour
- Ash colour
- Loss on Ignition
- Density Gradient analysis
- Instrumental analysis

TOOL MARKS

FOOT PRINTS / TRACK MARKS

- ✓ Track marks can be defined as the prints or impressions left by the criminal, his vehicle in and around the crime scene during the commission of the offence.
- ✓ Found in both - bodily and property offences.

They are in the form of

- Foot prints,
- Footwear prints,
- Tyre marks,
- Skid marks of vehicles,
- Drag marks

Blood stained foot print at scene of offence

Suspected foot print taken from accused

Super imposition

Collected from scene of offence

Sample foot print of suspected person

Collected from scene of offence

Sample foot print of suspected person

Tyre marks:

- Tread marks are transferred to the surface when tyre comes in contact with the surface.
- With the help of these tyre marks we can trace the vehicle, so these tyre marks act as track marks.

Tyre marks:

■ Case Study:

Police got a complaint that a person who is an employee in text book printing press is missing. In the police investigation they found a unknown dead body which face and head was damaged by big stone at city out skirts . The police doubted missing person's car driver and interrogated him.
